

EVVIVA

## *the first stainless steel kitchen in Brazil*

The Ino line is a unique and exclusive proposal for planned kitchens with doors and panels in stainless steel, developed and manufactured exclusively by Evviva, leveraging over 50 years of Bertolini Group's expertise in working with steel.

## *D.O.C. = Controlled Designation of Origin*

The Italian designation D.O.C. is used to certify the origin, characteristics, and quality of various types of products. Reflecting its Brazilian essence and the innovative proposal of the line, Ino D.O.C. is an evolution that carries the sophistication of its design with the nobility of its raw material.

stainless steel is 100% renewable, reducing environmental impact.

## *sophistication and robustness*

The Ino D.O.C. kitchen is clad in 304 stainless steel; the material used in high-end appliances. The line works with a thickness of 26 mm, creating an aesthetic of strength and presence.

## *minimalist design*

Visually striking, the Ino D.O.C. features an ergonomic design that eliminates sharp corners. With straight lines that highlight the uniqueness of stainless steel and continuous panels, making the furniture the true protagonist in any environment.

## ***gourmet atmosphere***

The INO D.O.C. doors are also clad internally in stainless steel.
